

Company Profile

The agency

YAK Agency is a **communication agency** specialized in the conception, creation and promotion of high-value projects.

Our agency was borne of different yet complementary experiences: creative communication and media relations, development of digital and print solutions, management of both new and traditional media. The common ground for such different aspects is given by some fundamental points: utmost importance to quality, inclination for internationality, development and enhancement of specific skills.

Over time, these peculiarities allowed us to stand out in specific market sectors and work with companies and associations of global importance. Like the yaks, the animals we derive our name from, we are specialized in niches where we do not fear competition, we like to work hard and our task is to lift up what is entrusted to us: to be precise, the stories of our clients. In which way? Providing strategy consulting and all the operational tools that are needed for the communication and promotion of the brand.

Specializations

Sport —01

We have taken part in sporting events in Europe and all over the world for over ten years, managing all their aspects: live coverage, press office, content production, social media management. We manage the communication of athletes, brands and sports federations of several disciplines, studying the best strategy for each of them.

02 — Retail

The world of retail has to face a new challenge: not only selling products, but also offering experiences. We help players of this sector to better understand their target, to position correctly and engage customers in the daily storytelling of their shopping offer.

Tourism —03

The tourism sector needs to constantly renew itself to meet the ever-changing needs of travelers. For this reason, we study innovative instruments and communication modes for accommodation facilities, tourism portals and associations.
